## MRB Schumag Ltd currently have a vacancy for a **Mechanical Design Engineer**

We are looking to recruit a high quality Mechanical Design Engineer with substantial experience of medium to heavy engineering.

The ideal candidate must have at least 3 years experience designing and detailing OEM turnkey projects, together with medium to heavy engineering OEM manufacturing experience. Auto CAD Inventor and Project Management experience would be advantageous.

A minimum of HND Mechanical Engineering qualification is desired, and duties are to include mechanical design calculations, adherence to customer and MRB Schumag specifications, preparation of specifications for sub contractors, and planning and assistance of site installation.

In addition, good communication skills, attention to detail, self-motivation, and interdepartmental awareness are desired for this position.

Excellent salary and package is available for the right person. In the first instance, please send a covering letter and current CV to: - Angela Dillon, Secretary to Managing Director at the above address.
